

How to use our online Google Classroom | 2021

You have been sent your Google login and password.

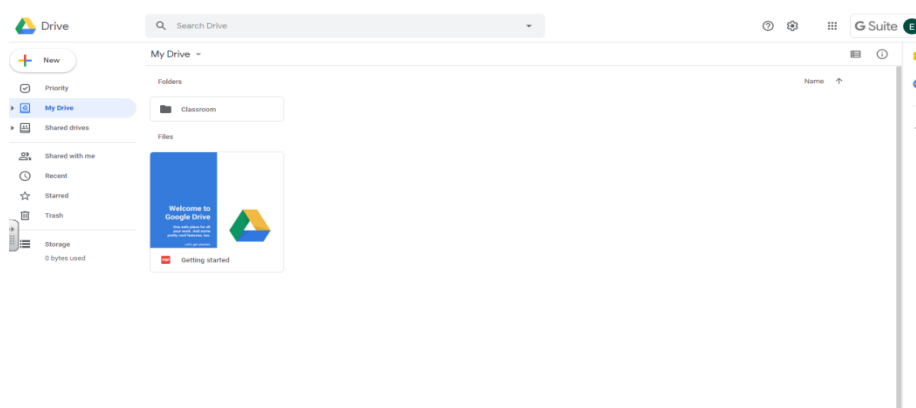

This can be found in your child's reading record.

1. Go to www.google.co.uk and sign in using the blue box on the right

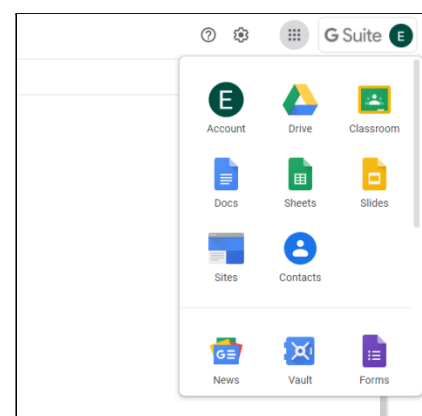

2. Login using your school username and password

3. Once logged in, you are in the google drive:

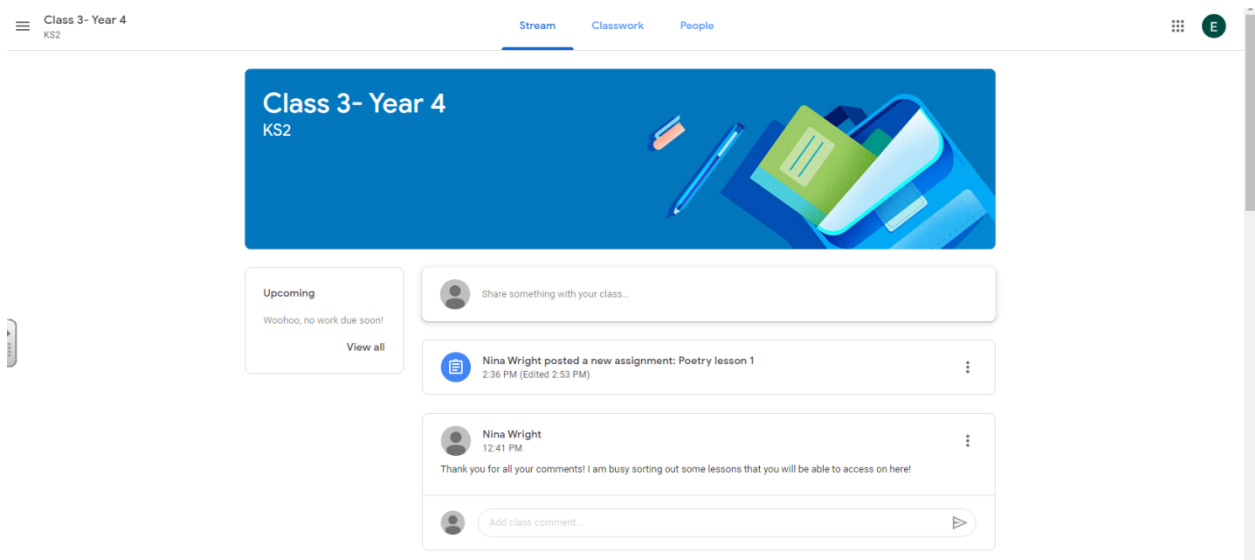

4. In the top right corner next to the GSuite logo, there are some dots. Click on the dots and it opens up. Select 'Google Classroom'.

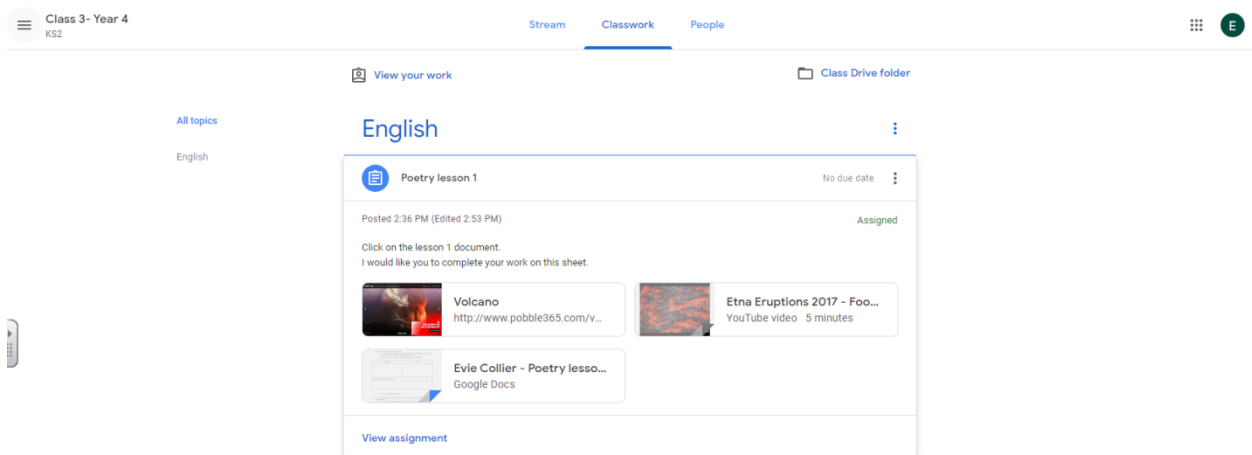

5. Your child has been invited to a class, so the first time they login, they need to join this class. Simply click 'join' and you will now have access to the classroom.
6. Class teachers will set work and this might be in a folder that you can click on and access/ do task or it might be that an individual lesson is assigned to your name.

You can view a **stream**, which enables staff to post questions. Students cannot start their own stream, but they can reply.

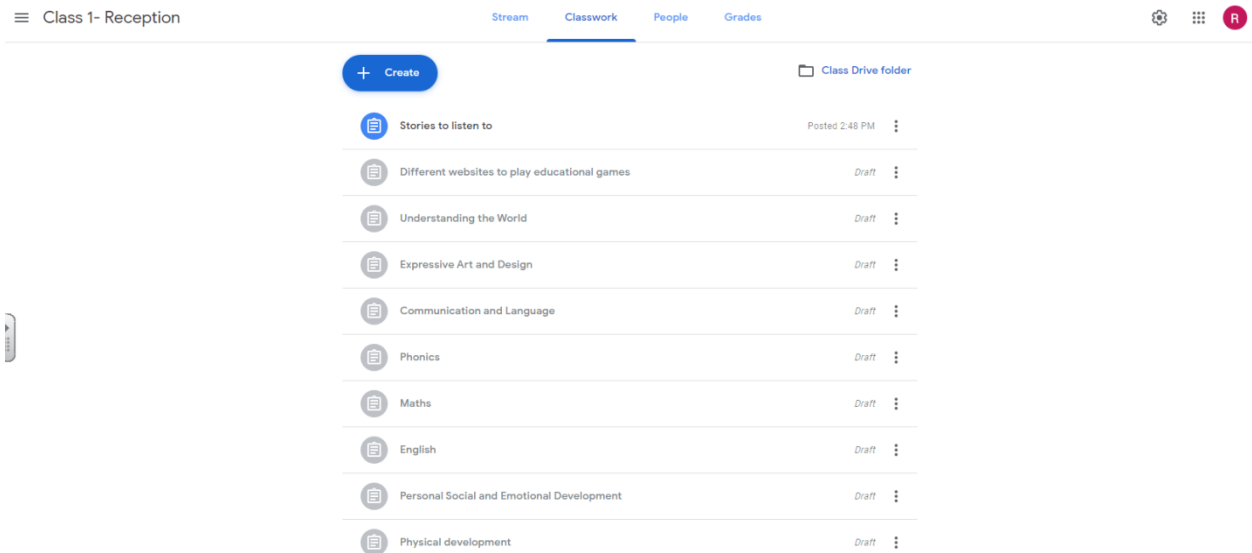

If you click on **classwork**, you can view assignments that are either class based or specific to your child...

When you have completed the assignment, you can 'TURN IN' which sends it back to the class teacher to look at and make comments on.

As and when all of this develops, we might post different subject folders with ideas of what you could do to support learning for each curriculum subject (example of this for EYFS below)

Your child's work will be stored in Google Drive

and they can create other documents in there as well. More information is below.
